AIRE

AIRE

Code: AL01
Line Color: Black

Tolerance: $\pm 3\%$
Specifications and product presentations are subject to change without prior notice.

Normative references

- (*) **RoHS Directive 2015/863 / EU**
- (*) **REACH 2023/SVHC 233**
- (*) If the product is required to comply with **ROSH** and/or **REACH** standards, consult with the seller (Only applicable in BLACK presentation).

Characteristics

Light and flexible hose made of plasticized PVC and reinforced with rigid shockproof PVC, which makes it highly flexible. Resistant to the action of atmospheric agents and numerous chemicals, with excellent insulating properties.

Application

- Aspiration and impulsion of: air, smoke, sawdust, shavings, textile fibers, and powders
- For ducts, ventilation, and gas elimination
- Movement and drainage of water from small fountains and artificial lakes
- Cable covering
- Particularly indicated for mobile installations

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Working temperature:
from 14°F to 122°F

Bending radius
1 times its inner diameter

Vacuum pressure
0.4 to 0.5 ATM = from 12 to 15 in Hg

ACEITE

AIRE ACEITE

Code: AL04

Line Color: Crystal blue with white spiral

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Characteristics

Lightweight and flexible hose made from plasticized PVC and reinforced with rigid, shock-resistant PVC, making it highly flexible. It is resistant to atmospheric agents and numerous chemicals, with excellent insulating properties.

Application

- Suction of fuel vapors
- Transfer of mineral oils
- Transfer of vegetable oils
- Transfer of low-pressure fuels

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Working temperature:
from 14°F to 140°F

Bending radius
1 times its interior diameter.

LIGHT

AIRE LIGHT

Code: AL05
Line Color: Gray

Tolerance: $\pm 3\%$
Specifications and product presentations are
subject to change without prior notice.

Characteristics

Extremely lightweight and flexible hose made from plasticized PVC and reinforced with rigid, shock-resistant PVC. It is resistant to atmospheric agents and many chemicals, with excellent insulating properties.

Application

Suction and conveyance of:

- Air
- Fumes
- Sawdust
- Shavings
- Textile fibers
- Dust

Particularly suitable for mobile installations

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Bending radius
1 times its interior diameter.

Working temperature:
from 23°F to 113°F

Vacuum pressure
0.3 ATM = 9 in Hg.

AIRE PESADO

AIRE PESADO

Code: AL06
Line Color: Green

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Characteristics

Lightweight and flexible hose made from plasticized PVC and reinforced with rigid, shock-resistant PVC, making it highly flexible. It is resistant to atmospheric agents and many chemicals.

Application

- Light suction in agricultural machinery: fluids at low pressure.
- Transfer of:
 - Air
 - Textile fibers
 - Fumes
 - Dust
 - Sawdust
 - Shavings
 - Pellets

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Bending radius
4 times its interior diameter.

Working temperature:
from 5°F to 122°F

Vacuum pressure
0.7 to 0.8 ATM = 21 to 24 in Hg.

ATÓXICO

AIRE PESADO ATÓXICO

Code: AL07

Line Color: Crystal with white spiral

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Normative references

FDA - Code of Federal Regulations
(**CFR**) title 21, parts 175.300, 177.1210 and 178.2010

Characteristics

Lightweight and flexible hose made from plasticized PVC and reinforced with rigid, shock-resistant PVC, making it very flexible. It is resistant to atmospheric agents and many chemicals. It does not transmit odor or taste.

Application

- Light suction in processes where a non-toxic grade is required

Used for:

- Food
- Juices
- Medications

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Bending radius
4 times its interior diameter.

Working temperature:
from 5°F to 122°F

AIRE PESADO HIGH FLEX

Tolerance: $\pm 3\%$
Specifications and product presentations are subject to change without prior notice.

AIRE PESADO HIGH FLEX

Code: AL08
Line Color: Crystal with blue spiral

Characteristics

Lightweight and flexible hose made from plasticized PVC and reinforced with rigid, shock-resistant PVC, making it highly flexible. It is resistant to atmospheric agents and many chemicals. The piping offers high flexibility.

Application

- Light suction in processes where greater flexibility is required. Suction and conveyance of:
 - Air
 - Textile fibers
 - Fumes
 - Dust
 - Sawdust
 - Shavings
 - Pellets

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Bending radius
2 times its interior diameter.

Working temperature:
from 5°F to 122°F

Vacuum pressure
0.7 to 0.8 ATM = 21 to 24 in Hg.

AIRE PESADO LOW TEMP

AIRE PESADO LOW TEMP

Code: AL09

Line Color: Crystal with blue spiral

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Application

- Light suction in processes where greater flexibility at low temperatures is required. Suction and conveyance of:
- Air
- Textile fibers
- Fumes
- Dust
- Sawdust
- Shavings
- Pellets

Characteristics

Lightweight and flexible hose made from plasticized PVC and reinforced with rigid, shock-resistant PVC, making it very flexible. It is resistant to atmospheric agents and many chemicals. Recommended for use in environments with temperatures as low as -40°C. Manufactured with high molecular weight PVC.

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Bending radius
4 times its interior diameter.

Working temperature:
from 40°F to 140°F

Vacuum pressure
0.8 ATM = 24 in Hg.

ALAPOOL

Tolerance: +/- 3%
Specifications and product presentations are
subject to change without prior notice.

ALAPOOL

Code: AL10
Line Color: Crystal with white spiral

Characteristics

Lightweight hose made from EVA resin and polyethylene, materials that provide high flexibility, self-floating properties, and resistance to abrasion, UV rays, friction, atmospheric agents, and chemicals.

Application

- Cleaning of fish farms by suction and discharge
- Cleaning of swimming pools by suction and discharge

Technical Information

**Internal surface smooth and external surface
corrugated:** extremely flexible.

Bending radius
3 times its interior diameter.

Working temperature:
from 14°F to 122°F

Vacuum pressure
0.4 to 0.5 ATM = 12 to 15 in Hg.

ALAPOOL BICAPA

Code: AL12
Line Color: blue with white interior

Characteristics

Flexible hose made from EVA and polyethylene, materials that provide increased abrasion resistance, self-floating properties, and resistance to UV rays, friction, atmospheric agents, and chemicals.

Application

- Cleaning of fish farms by suction and discharge where higher abrasion resistance is required
- Cleaning of swimming pools by suction and discharge where higher abrasion resistance is required

Technical Information

**Internal surface smooth and external surface
corrugated:** extremely flexible.

Bending radius
3 times its interior diameter.

Working temperature:
from 14°F to 122°F

ALIMENTOS

Code: AL13
 Line Color: Crystal with white spiral

Tolerance: $\pm 3\%$
 Specifications and product presentations are subject to change without prior notice.

Application

Transport of foodstuffs:

- Juices
- Wines
- Jams
- Dairy products
- Syrups
- Soft drinks
- Beverages with an alcohol concentration not exceeding 28% (56° G.L.)
- Transport of dry, granular materials

Characteristics

Robust, non-toxic hose made from plasticized PVC with rigid spiral reinforcement, providing the flexibility of a hose and the strength of a rigid tube. It is resistant to atmospheric agents and a wide range of chemicals.

Internal and external surface smooth (1/2" to 3" and 10"): facilitates clamp adjustment.

Internal surface smooth and external surface corrugated (3 1/2" to 8"): Enhances flexibility.

ASPIRADORA

Code: AL16
Line Color: Metallic gray

Tolerance: $\pm 3\%$
Specifications and product presentations are subject to change without prior notice.

Characteristics

Highly lightweight and flexible hose made from EVA and polyethylene, materials that provide greater drag resistance, self-floating properties, and resistance to various atmospheric and chemical agents. Left-hand or right-hand cord.

Application

- In industrial equipment for suction
- In household equipment for suction
- Pneumatic cleaning
- Hydraulic cleaning
- Where high flexibility is required

Technical Information

Internal and external surface corrugated: extremely flexible.

DREN

DREN

Code: AL21
Line Color: Brick red

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Application

- Drainage of sports fields, roads, railways, airports, retaining walls, agricultural fields, and constructions.
- Groundwater level control.
- Washing of alkaline soils.
- For underground irrigation.

Characteristics

Corrugated perforated hose, made of high-density polyethylene.

Resistant to corrosion and the action of a wide range of chemicals (alkalis and acids, organic and inorganic solvents).

The ribs that protect the openings prevent clogging, unlike other pipes used for the same purpose, which require an additional filtering element (textile, coconut fiber, straw, gravel).

Technical Information

Corrugated inner and outer surface

Working temperature:
from 14°F to 140°F

Specifications and product presentations are subject to change without prior notice.

Normative references

FDA - Code of Federal Regulations
(**CFR**) title 21, parts 175.300, 177.1210 and 178.2010

Characteristics

Duct made of plasticized PVC with a semi-rigid shock-resistant PVC reinforcement.
Highly flexible and lightweight, allowing for perfect fitting even in tight spaces.

Application

- Air and vapor transfer where a non-toxic grade is required
- Air conditioning installation and other applications where a non-toxic grade is required

Technical Information

Corrugated inner and outer surface

Working temperature:
from 14°F to 122°F

ELÉCTRICO LIQUID TIGHT UL

Code: AL24
Line Color: Gray

Tolerance: $\pm 3\%$

Specifications and product presentations are subject to change without prior notice.

Characteristics

Liquid Tight Flexible Non-Metallic Conduit Type B

Lightweight and flexible hose made of flexible PVC with a rigid shock-resistant PVC spiral reinforcement. Resistant to corrosion, abrasion, and is self-extinguishing (flame-resistant). Resistant to sunlight, water, and chemicals.

Normative references

Certificate UL 1660
FILE E220585

Application

To be used where conductors need protection from vapors, liquids, solids, or outdoor conditions, in installations subject to vibrations, movements, or settlements, and for electrical installations.

- Can be buried directly or encased in concrete.
- Compatible with non-metallic connectors for easy installation.
- Designed for commercial and industrial applications.
- For flexible connections.

It can be used under ANSI / NFPA-70, National Electrical Code (NEC) Article 356

- Agricultural constructions Article 547.5
- Power circuits and interconnection cables; Under raised floors Article 645.5 (E)(2)
- Information technology equipment Article. 300.22 (D)
- Flexible connections to pool, spa, and jacuzzi motors Article 680.21 (A)(3) and 680.42 (A)(1)
- Wiring for secondary circuits for neon tubes over 1000 volts Article 600.3 (A)

For hazardous locations according to:
501.10 (B)(2) Class I Div.2
502.10 (A)(2) y (B)(2) Class II Div. 1 and 2
503.10 (A) (3) y (B) Class III Div. 1 and 2

Technical Information

smooth Internal and external surface: allows for easy threading of conductors.

Working temperature:
from -0.4°F to 176°F

Clasificación

176°F dry, 140°F wet, 158°F oil-resistant

ENOFLEX

Code: AL28
Line Color: Crystal with red spiral

Tolerance: $\pm 3\%$
Specifications and product presentations are subject to change without prior notice.

Normative references

FDA - Code of Federal Regulations
(CFR) title 21, parts 175.300, 177.1210 and 178.2010

Application

- Transfer of wines
- Transfer of dairy products, vegetable oils, and mineral oils

Characteristics

Free of phthalates

Robust, non-toxic hose made of plasticized PVC with a rigid shock-resistant spiral reinforcement, combining the flexibility of a hose with the strength of a rigid pipe. Resistant to atmospheric agents and a wide range of chemicals.

It is compatible with wines and alcoholic beverages up to 28% ethyl alcohol (ethanol) when used at room temperature.

It is not recommended for use in temperatures above 40°C, as this could compromise the stability of the PVC compound. Compatibility may vary with other types of alcohol or under extreme conditions. Specific testing is suggested depending on the application.

Smooth internal and external surface (1/2" to 3" and 10"):
facilitates clamp adjustment.
Smooth internal and corrugated external surface (3 1/2" to 8"):
improves flexibility.

Technical Information

Smooth internal and external surface
Smooth inner and corrugated outer surface

Bending radius
5 times its interior diameter.

Working temperature:
from 14°F to 104°F

Vacuum pressure
0.8 ATM = 24 in Hg

ESTRUCTURAL

Code: AL29
Line Color: Black

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Characteristics

Lightweight corrugated hose made of high-density polyethylene. Adapts to uneven terrain. Chemically resistant to alkaline materials and acids, as well as organic and inorganic solvents.

Application

- Cable (strand) protection in construction (post-tensioned)
- Low-pressure water movement
- Electrical wiring in cities and highways
- Can be used outdoors or buried

Technical Information

corrugated inner and outer surface

Working temperature:
from 14°F to 140°F

Bending radius
7 times its interior diameter.

HEAVY DUTY CRISTAL CON ANTIESTÁTICO ATÓXICO

Code: AL33

Line Color: Crystal with crystal blue spiral

Tolerance: $\pm 3\%$

Specifications and product presentations are subject to change without prior notice.

Application

- Where static charge elimination is required.
- Transfer of powder, pellets, granular materials, and vacuum lines in paper mills.
- Transport of food, juices, jams, syrups, wines, dairy products, and soft drinks.
- Transport of beverages with an alcohol concentration not exceeding 28% (56° G.L.).
- Transport of dry granular materials.

Characteristics

Robust hose, non-toxic, made of plasticized PVC with a rigid PVC spiral reinforcement, combining the flexibility of a hose with the strength of a rigid pipe. Resistant to atmospheric agents and a wide range of chemicals. Made with copper wire for static charge elimination.

HIDROTEC

Code: AL34
Line Color: White

Tolerance: $\pm 3\%$
Specifications and product presentations are subject to change without prior notice.

Characteristics

Durable hose, made with flexible PVC and rigid shock-resistant PVC reinforcement; providing the flexibility of a hose and the solidity of a rigid pipe. Resistant to atmospheric agents and chemicals.

Smooth internal and external surface (1/2" and 4"): facilitates clamp adjustment.

Normative references

External diameters from 1/2" to 3" comply with IAPMO PS 33 - 2010c / NSF 50 standards.

Application

- Ideal for replacing traditional pipes in installations for hot tubs, swimming pools, drainage lines, and peripheral hydraulic systems.

Technical Information

Smooth internal and external surface

Working temperature:
from 5°F to 149°F

HOSPITAL ATÓXICO

Tolerance: +/- 3%
Specifications and product presentations are
subject to change without prior notice.

HOSPITAL ATÓXICO

Code: AL35
Line Color: Crystal with white spiral

Characteristics

Very flexible and durable hose made of plasticized PVC with a rigid shock-resistant PVC spiral reinforcement.

Resistant to atmospheric agents and chemicals.

Its design prevents clogging and crushing.

Extremely lightweight. Should be sterilized using gases.

Application

- Used in hospitals (inhalotherapy)
- Transport of gases where a non-toxic grade is required

Normative references

FDA – Code of Federal Regulations
(CFR) title 21, parts 175.300, 177.1210 and 178.2010

JARDIN

JARDIN

Code: AL36
Line Color: Crystal green with white spiral

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Application

- Mainly recommended for irrigation, as its flexibility facilitates movement while the rigid reinforcement prevents bending or collapsing, ensuring uninterrupted irrigation.

Characteristics

Very flexible and durable hose made of plasticized PVC with a rigid shock-resistant PVC spiral reinforcement, providing the flexibility of a hose and the solidity of a rigid pipe.

Resistant to suction and pressure.

Good resistance to atmospheric agents and a wide range of chemicals.

Its design prevents clogging and crushing.

Technical Information

Smooth internal and external surface

Working temperature:
from 14°F to 131°F

Bending radius
5 times its interior diameter.

MINAS

Tolerance: $\pm 3\%$
Specifications and product presentations are subject to change without prior notice.

MINAS

Code: AL37
Line Color: Crystal with gray spiral

Characteristics

Light and flexible hose made of high molecular weight plasticized PVC with a rigid shock-resistant PVC spiral reinforcement, making it very flexible.

Resistant to atmospheric agents and a wide range of chemicals.

Application

- For medium suction and/or transfer.
- For waste processing pumps, construction, and mining.
- Handling slurries, gold dredging, and irrigation lines.

Technical Information

Internal surface smooth and external surface corrugated: extremely flexible.

Bending radius
5 times its interior diameter.

Working temperature:
from -4°F to 150.8°F

Vacuum pressure
1 ATM = 30 in Hg

FDA - Code of Federal Regulations
(CFR) title 21, parts 175.300, 177.1210 and 178.2010.

Application

- Ideal for use in constant curvature with vacuum pumps.
- For pressure or suction of various industrial and food products, such as medications, food, and dry, granular, or pelletized materials.

Technical Information

Smooth internal and external surface

Working temperature:
from 14°F to 149°F

Bending radius
7 times its interior diameter.

Vacuum pressure
1.0 ATM = 30 in Hg

SUPER SUCTION CORPORATION

Code: AL45
Line Color: Green GY

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Application

- Suction and discharge.
- Agricultural irrigation.
- Suction and pressure of water, fertilizer, manure, and pesticides.

Characteristics

Robust hose made of plasticized PVC with rigid shock-resistant spiral reinforcement, providing the flexibility of a hose and the strength of a rigid pipe.

Good resistance to suction and pressure. Resistant to atmospheric agents and many chemicals.

Smooth internal and external surface (1/2" to 3" and 10"): facilitates clamp adjustment.

Smooth internal and corrugated external surface (3 1/2" to 8"): enhances flexibility.

Technical Information

Smooth internal and external surface
Smooth inner and corrugated outer surface

Working temperature:
from 14°F to 149°F

Burst pressure
2.5 times the working pressure

SUCTION LOW TEMPS

SUCTION LOW TEMPS

Code: AL46

Line Color: Crystal with blue spiral

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Application

- For suction and transfer of water
- Construction, mining, agriculture, and irrigation lines in sub-zero temperatures

Characteristics

Light and flexible hose made of plasticized PVC with rigid shock-resistant PVC spiral reinforcement. Made with high molecular weight PVC and improved compounds, providing greater flexibility at low temperatures and increased abrasion resistance compared to standard PVC.

Smooth internal and external surface (3/4" to 3"): facilitates clamp adjustment.

Smooth internal and corrugated external surface (3" to 6"): enhances flexibility.

Technical Information

Smooth internal and external surface
Smooth inner and corrugated outer surface

Bending radius
5 times its interior diameter.

Working temperature:
from -4°F to 150.8°F

TRANSMETAL PARA COMBUSTIBLES

Code: AL47
Line Color: Crystal black

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Characteristics

Light and flexible hose made of plasticized PVC with steel reinforcement, offering the flexibility of a hose and the strength of a rigid pipe. Smooth internal surface.

Good resistance to suction and pressure.

Resistant to atmospheric agents and many chemicals.

Ideal for handling oils and gasoline.

Application

- For use in the transfer of fuels and oils

Technical Information

Smooth inner and outer surface

Working temperature:
from 5°F to 149°F

Bending radius
7 times its interior diameter.

ALATHANE DUCTING ATÓXICO

ALATHANE DUCTING ATÓXICO

Code: AL48
Line Color: Crystal

Tolerance: +/- 3%
Specifications and product presentations are
subject to change without prior notice.

Application

- Suction and transport of materials in the pharmaceutical, food, and wood industries.
- Abrasive solids: powders, fibers, chips, and granules; gaseous and liquid media for dust removal.
- In suction plants, industrial vacuums, paper suction, and textile fibers.
- Durable protective tubing.

Characteristics

Medium weight non-toxic polyurethane hose reinforced with steel spiral.

Provides high resistance to abrasion, tear and chemical agents, high flexibility at low temperatures and good compression that allows a perfect accommodation even in difficult spaces.

POLYURETHANE CLEAR TRANSMETAL

Code: AL49
Line Color: Crystal yellow

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Application

- Used for transfer via pneumatic systems for powders, fumes, pellets, and other dry granular materials.
- Handling of grains, seeds, and more.
- Sand recovery line.
- Metal burr recovery line in machining processes.

Characteristics

Flexible hose with a clear polyurethane inner lining, transparent flexible PVC cover, and steel spiral reinforcement, combining hose flexibility with the strength of a rigid pipe.

Transparent surface: allows visual confirmation of material flow.

Steel reinforcement: prevents static electricity buildup and maintains continuous flow.

Polyurethane interior: provides high abrasion resistance.

Technical Information

Smooth inner and outer surface

Working temperature:
from -4°F to 194°F

Bending radius
8 times its interior diameter.

POLYURETHANE SUCTION HOSE

Code: AL50

Line Color: Crystal with green GY spiral

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Application

- Suction and discharge of materials requiring flexibility at low temperatures and high abrasion resistance.
- Transfer via pneumatic systems for pellets and other dry granular materials.
- Transfer of seeds and grains.
- Transfer of ice.
- Handling of liquid manure, septic tanks, hydro-excavation, and both dry and wet fertilizers.

Characteristics

Light and flexible hose made of clear polyurethane with PVC spiral reinforcement, allowing visual confirmation of material flow and helping the operator inspect for contamination during operation.

Smooth internal and corrugated external surface; enhances flexibility.

Smooth interior reduces material buildup Offers high abrasion resistance.

Technical Information

Smooth inner and corrugated outer surface

Working temperature:
from -4°F to 194°F

Bending radius
8 times its interior diameter.

Vacuum pressure
0.8 to 0.9 ATM = 24 to 27 in Hg

FOOD AND GRADE POLYURETHANE DUCTING

Code: AL51
Line Color: Crystal blue

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Application

- Suction, discharge, and transfer via pneumatic systems of:

Powders, pellets, fumes, air
Pharmaceutical materials
Other dry granular food-grade materials requiring tear resistance

Characteristics

Light and flexible hose made from a PVC and polyurethane blend with a rigid PVC spiral. These materials allow visual confirmation of material flow and help the operator inspect for contamination during operation. The smooth interior reduces material buildup and provides quiet performance.

Smooth internal and corrugated external surface: enhances flexibility.

Polyurethane interior: offers high abrasion resistance.

POLYURETHANE LINED

Code: AL53

Line Color: Crystal with black spiral

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Application

- Designed for applications where severe abrasion is a critical factor.
- Transfer via pneumatic systems of pellets and other dry granular materials.
- Transfer of mulch, wood chips, seeds, grains, dry and wet fertilizers, and petroleum-based oils.

Characteristics

Flexible hose with an abrasion-resistant polyurethane inner layer, covered externally with transparent plasticized PVC, allowing for flow confirmation, and reinforced with a rigid, anti-shock PVC spiral. Its corrugated construction enhances flexibility. Remains flexible at sub-zero temperatures. Increases lifespan and reduces operational costs compared to rubber and PVC. UV resistant.

Smooth internal and corrugated external surface: improves flexibility.

Polyurethane interior: provides high abrasion resistance.

Technical Information

Smooth inner and corrugated outer surface

Working temperature:
from -40°F to 149°F

Bending radius
4 times its interior diameter.

INDUSTRIAL ATÓXICA

Code: AL57
Line Color: Crystal

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

Normative References

FDA - Code of Federal Regulations
(CFR) Title 21, Parts 175.300, 177.1210, and 178.2010.

Characteristics

A flexible, single-layer transparent PVC hose that allows for visual confirmation of the fluid, designed for low-pressure fluid transfer, and resistant to outdoor use.

Application

- Transport of non-abrasive fluids.
- Discharge hose: suction use is at the user's risk.
- Food-grade hose.

Technical Information

Smooth internal surface

Working temperature:
From 23°F to 140°F

INDUSTRIAL TRAMADA

Tolerance: +/- 3%

Specifications and product presentations are subject to change without prior notice.

INDUSTRIAL TRAMADA

Code: AL58

Line Color: Crystal

Characteristics

Flexible hose with three layers: Inner layer: PVC, Intermediate layer: Reinforced with threads, Outer layer: Transparent PVC, allowing for visual confirmation of the fluid. Designed for medium-pressure fluid conveyance and resistant to outdoor use.

Application

- Conveyance of non-abrasive fluids.
- Discharge hose; suction use is at the user's risk.

INDUSTRIAL TRAMADA ATÓXICA

INDUSTRIAL TRAMADA ATÓXICA

Code: AL59
Line Color: Crystal

Tolerance: +/- 3%
Specifications and product presentations are
subject to change without prior notice.

Normative References

FDA - Code of Federal Regulations
(CFR) Title 21, Parts 175.300, 177.1210, and 178.2010

Characteristics

Flexible three-layer hose: internal layer of PVC, middle layer of thread, and external layer of transparent PVC for visual confirmation of the fluid. Designed for conveying fluids under medium pressure and resistant to outdoor use.

Application

- Conveyance of non-abrasive fluids.
- Discharge hose; suction use is at the user's risk.
- Food-grade hose.

JARDIN TRAMADA

JARDIN TRAMADA

Code: AL60
Line Color: Green

Tolerance: +/- 3%
Specifications and product presentations are
subject to change without prior notice.

Characteristics

Flexible hose with three layers: inner PVC, middle textile reinforcement, and outer PVC.

Application

- Domestic or professional use in gardening
- Supply lines for irrigation
- To increase the hose's durability, it is advised not to leave it exposed to direct sunlight after use.

Technical Information

Smooth internal surface

PLANA

PLANA

Code: AL61
Line Color: Blue

Tolerance: +/- 3%
Specifications and product presentations are subject to change without prior notice.

Application

- Irrigation of crops
- Water discharge

Characteristics

Hose made from PVC with ultraviolet inhibitors that reduce aging and environmental damage.

Resistance to corrosion and degradation from environmental factors.

High flexibility at low temperatures.

Easy to transport and connect.

High-tensile textile reinforcement and a blue thermoplastic hose cover.

Technical Information

Smooth internal surface

Working temperature:
From 14°F to 122°F

CONECTORES ELÉCTRICOS

CONECTORES ELÉCTRICOS

Code: AL62

Line Color: Gray

Characteristics

Resistance to corrosion and degradation from environmental factors, ease of transport and coupling

Application

• Connection with electrical hoses for electrical installations

Technical Information

• **Working temperature:**
From -50°F to 122°F
